Atlanta Gas Light

Update from Atlanta Gas Light on the Wade Green Road Pressure Improvement Project

Atlanta Gas Light's Wade Green Road Pressure Improvement project has been underway on Jiles Place and Jiles Road since late June. Construction crews are now in an area of Jiles Road that forces us to narrow traffic to one lane for each direction of Jiles Road to help ensure worker and driver safety but will return to two lanes in each direction once installation is complete. Our crews have been working diligently to minimize the impact on you and expect to be there through late September to complete this portion of the pipeline installation, barring any weather or unforeseen delays.

Please allow extra time as needed for traveling through these areas to help ensure the safety of other drivers, cyclists, pedestrians, and pipeline workers.

This is a particularly challenging area of construction, and we will reach out to the community again if the work in this area extends beyond the end of September. Pipeline installation is expected to continue in the area of Jiles Road between the vicinity of Old Hwy 41 and Cobb Parkway through mid-November. Also, please note that paving crews will be on Jiles Road once all pipeline installation on Jiles Road is complete to restore the affected lanes of the roadway.

To minimize traffic delays, we have extra traffic control staff on hand to help guide drivers out of neighborhood entrances and driveways directly off the road. Metal plates and temporary asphalt are used in the roadway to protect the active installation area during non-work hours and ensure a smooth transition for drivers between the active work area and the undisturbed roadway. Additionally, our work area is swept daily to remove all dirt, dust, and debris.

Because of the growth in your area, Atlanta Gas Light is installing this pipeline to ensure that we are available when we are needed the most during the coldest days in the winter. We recognize the inconveniences and disruptions construction for any infrastructure improvement that benefits the community may cause (such as roads, sidewalks, water, sewer, electric, broadband, etc.), and we know there are several active projects from other companies in the area. We will continue to do our best to be good a neighbor during construction and appreciate the community's patience and understanding while we complete this important project.

Work hours will generally be 8:00 a.m. to 5:00 p.m. Mon – Sat or as permitted by the City.
Please contact Atlanta Gas Light directly with any questions at 404-584-3129 or wadegreen@southernco.com.
